+91-9588950817 | sauravjorwal44@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Product-minded engineer with a strong technical foundation in full-stack development and a track record of shipping user-facing products. Experienced in identifying user needs, iterating on product decisions based on feedback, and collaborating across design and engineering. Passionate about consumer tech, AI-first product workflows, and building solutions that drive measurable user impact.

SKILLS

Product: User Research, Product Thinking, Data Analysis, A/B Testing, Usability Testing, Roadmapping

Technical: JavaScript, Python, React.js, Node.js, REST APIs, MongoDB, PostgreSQL, Docker

Tools: Figma (basic), Postman, Git, SQL, Excel/Google Sheets, D3.js (data visualization)

EXPERIENCE

Software Engineering Intern - Future Kmuniti

Jun 2025 – Jul 2025

- Identified backend bottlenecks through performance analysis and drove 20% latency reduction, directly improving user experience across services. [Verify](#)
- Collaborated cross-functionally to optimize data pipelines, achieving 35% faster retrieval — reducing friction for end users.

Data Analytics Job Simulation - Deloitte

Mar 2026

- Analyzed 50k+ rows of business data to surface 3 key operational bottlenecks, translating findings into actionable recommendations that improved efficiency by 15%. [Verify](#)
- Applied forensic analytics to detect financial discrepancies — a data-driven, high-accuracy decision-making exercise with 98% accuracy.

Software Engineering Job Simulation - JPMorgan Chase & Co.

Mar 2026

- Improved financial dashboard performance by 25% through API refactoring, directly enhancing usability for end users interacting with real-time data. [Verify](#)

PROJECTS

SuiteSpot | Full-Stack Property Platform

[GitHub](#) | [Live](#)

- Identified user need for visual travel discovery; designed and shipped a custom D3.js 3D globe feature based on user feedback, increasing engagement with travel metrics.
- Reduced listing load time by 40% through performance optimization — directly improving perceived responsiveness and user retention.

StockBridge (Zerodha Clone) | Consumer Fintech Product

[GitHub](#) | [Live](#)

- Designed end-to-end trading experience for 100+ simulated market assets, prioritizing dashboard clarity and real-time state accuracy for a seamless user flow.
- Drove 30% reduction in portfolio data retrieval time through iterative optimization, improving core user task completion speed.

VertexConnect | Real-Time Communication Product

[GitHub](#) | [Live](#)

- Led usability testing iterations to improve perceived responsiveness of video/audio interface; maintained sub-200ms latency as a core product quality benchmark.
- Achieved 99.9% availability through architectural decisions prioritizing reliability — a key metric for real-time communication products.

EDUCATION

Rajasthan Technical University

Aug 2022 – Present

B.Tech in Computer Science – CGPA: 8.8 / 10.0

Kota, India

Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Data Science & Big Data Analytics, Database Management, Computer Networks, Web Development
