SUMMARY

Full Stack Developer specializing in the MERN stack (MongoDB, Express, React, Node.js). Experienced in RESTful APIs and optimizing database performance during internship tenure at Future Kmuniti. Focused on engineering low-latency real-time applications, scalable web solutions, and interactive data visualizations.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, Java

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, Socket.io, ASP.NET Core

Databases: MongoDB, PostgreSQL, MySQL, Redis

Tools & Platforms: Git, Docker, Postman, Linux, CI/CD, GraphQL

EXPERIENCE

Software Engineering Intern - Future Kmuniti

Jun 2025 – Jul 2025

- Architected 10+ RESTful APIs using Node.js, reducing backend latency by 20%. [Verify](#)
- Optimized SQL/NoSQL queries to improve data retrieval speeds by 35% across services.

Data Analytics Job Simulation - Deloitte

Mar 2026

- Analyzed 50k+ rows of business data to identify 3 key bottlenecks, improving efficiency by 15%. [Verify](#)
- Utilized forensic analytics to detect financial discrepancies with a 98% accuracy rate.

Software Engineering Job Simulation - JPMorgan Chase & Co.

Mar 2026

- Refactored API logic for financial dashboards, increasing data processing speed by 25%. [Verify](#)
- Debugged fintech modules to ensure 85%+ code coverage and robust system performance.

PROJECTS

SuiteSpot | Node.js, Express.js, MongoDB, Cloudinary, Bootstrap, D3.js

GitHub | Live

- Spearheaded a full-stack property platform with Passport.js auth, Joi validation, and Cloudinary+MapTiler media pipeline, achieving 100% secure session management.
- Optimized MongoDB indexing and SSR to handle concurrent listings with 40% faster load; built custom D3.js 3D globe to visualize travel metrics based on user feedback.

StockBridge (Zerodha Clone) | React.js, Node.js, Express.js, MongoDB

GitHub | Live

- Engineered scalable dual-app architecture managing real-time state for 100+ simulated market assets with high-performance dashboard.
- Built high-throughput RESTful APIs for complex trading logic, reducing portfolio data retrieval by 30% via database refactoring and query optimization.
- Implemented unit and integration tests with edge case coverage, ensuring fault-tolerant API behavior and validated failure modes across trading logic.

VertexConnect | React.js, Node.js, WebRTC, Socket.io, MongoDB

GitHub | Live

- Facilitated low-latency P2P communication via WebRTC and Socket.io, maintaining sub-200ms latency for synchronized video, audio, and real-time chat.
- Designed modular MERN architecture with JWT auth ensuring 99.9% availability; iterated on UI based on usability testing to improve perceived responsiveness.

EDUCATION

Rajasthan Technical University

Aug 2022 – Present

B.Tech in Computer Science – CGPA: 8.8 / 10.0

Kota, India

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management (DBMS), Artificial Intelligence, Object-Oriented Programming, Web Development, Data Science & Big Data Analytics
